

Scholarship application letter

Dear sir/Madam,

I am submitting this document in support of my application for acceptance into your Masters of Engineering. I am now versed in a broad range of subjects related to civil engineering after five years of diligent study in my bachelor of civil engineering degree and less than two years of work experience. I am applying to the course in order to acquire cutting edge knowledge.

Growing up, I have always been passionate about engineering and dreamed of becoming an engineer. As a child, I was born in Tigray which was fairly underdeveloped for better education. I have always worked hard despite financial hardships in order to further myself academically and professionally. During my childhood, I enjoyed school a lot. I stayed after school to complete extra assignments and asked for more just for curiosity's sake. Engineering first caught my interest when I was told about it by some fantastic, engaging, knowledgeable people in the field and I sought out extra studies, and it just challenged me. The daily challenge of solving engineering problems involving critical thinking and engineering principles appeals to me. Having the knowledge and doing the things that I possess are what makes me happy. Perhaps one day I will have the opportunity to reach anyone interested in listening to engineers like I did when I was a child.

As a result of the ongoing war currently going on in Ethiopia, this scholarship will enable me to gain new experiences as a result. In 2020, the Ethiopian government began military operations against the Tigray People's Liberation Front, which ruled the region, which led to the outbreak of the war. Several hospitals, schools, factories, and businesses were destroyed by Ethiopian federal forces, regional militias, and Eritrean armed forces. As a result of the dire situation, more than 2 million people fled their homes, and thousands fled to Sudan, leaving 6 million innocent civilians in need of aid.

It's not safe for me to go back to Tigray because that's where the attacks happen, so I fled to Adis Ababa, which is the capital of Ethiopia, and the authorities are illegally preventing anyone from working here or studying here due to their ethnicity.

By receiving this scholarship, I will be well equipped to focus all my efforts on achieving my goals. The opportunity to attend this course will enable me to represent "University name" throughout my future career, and I am extremely grateful to be able to participate. Your consideration of this application is greatly appreciated and I am looking forward to my arrival at "place of name."

Sincerely,

Solomon desalegn
